Hi Remy, nice to see you around!

I see you have extensive experience navigating market entry across frontier markets. I'm currently building a startup called Apptify. We are currently at the MVP stage with our sights set on a global market, though our immediate focus is on establishing a strong foothold here in Indonesia.

I also noticed your role as a Senior Executive Advisor at Strategy&. I have a deep respect for the strategic frameworks utilized at PwC and the major consulting firms. I look forward to following your insights on market strategy here on LinkedIn.

Thanks in advance for the connection!

Dear Remy,
Thank you for your invitation.
I was particularly interested in your observation that "the gap is not capital, but investable design." I couldn't agree more.
We are currently developing INVERA, a platform focused on preparing and connecting investment-ready projects with qualified capital through a structured, compliance-driven process.
I believe our work touches similar challenges from different perspectives. I would be delighted to stay connected and explore whether there may be opportunities for collaboration.
Kind regards,
Lady Alexandrina Victoria York

Hi Remy,

Iraq being put into the FATF - Increased Monitoring list as of June 2026. How would it impact fintechs, both within Iraq and also those fintechs outside wanting to connect to Iraq.

Happy to hear your point of view.

FRIDAY

Remy Zambarakji • 12:57 AM
Hi Tim,

The main impact will be tighter compliance and more cautious banking partners. Iraqi fintechs may face higher KYC/AML costs, while foreign fintechs could see slower onboarding, settlement and partnerships
